Figure 1 North Carolina Cases by date of symptom onset. Of note: some cases do not yet have a confirmed date of symptom onset and are not included in this graph.

Data from NC EDSS as of 08/01/2022. Counties with 1-3 cases are labelled yellow, 4-10 cases orange, >10 cases red.

Figure 2 Counties affected as of August 1, 2022

Includes data available as of **August 1, 2022, at 12:45 PM**. Nearly all monkeypox cases in North Carolina have been in men who have sex with men, consistent with findings from other jurisdictions. Gender is self-reported. Data are provisional and subject to change as new information is received.
