North Carolina Monkeypox Cases by Date of Symptom Onset*, 2022

*Symptom onset date is missing for 20 cases. Data will be updated as additional information becomes available

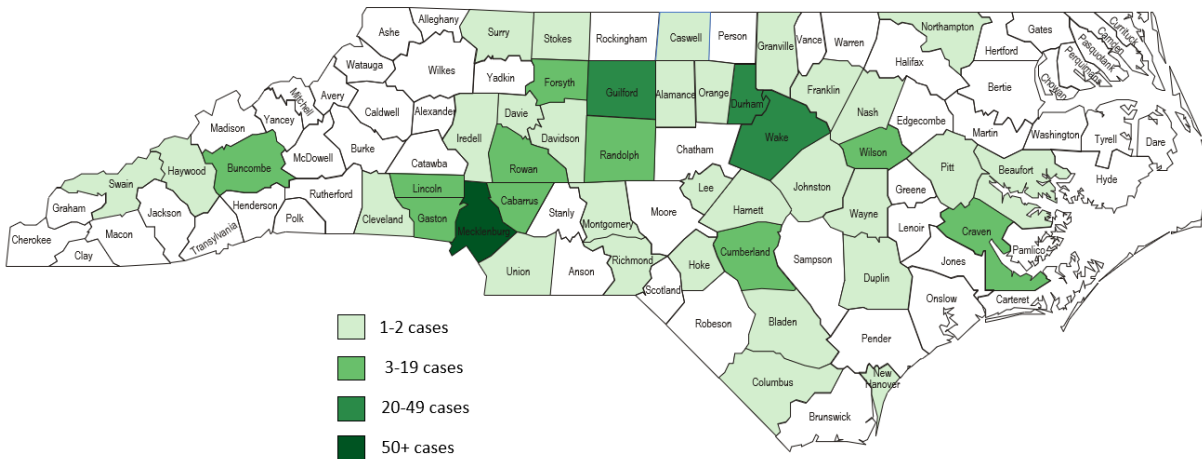

Figure 1: Monkeypox Cases by County, 2022

Includes data available as of **August 31, 2022, at 3:00 pm**. Nearly all monkeypox cases in North Carolina have been in men who have sex with men, consistent with findings from other jurisdictions. Gender is self-reported. Data are provisional and subject to change as new information is received.
